June 5, 2024

Dear colleagues from 2296281 Alberta Inc.

I am writing to express my interest in the 3D Printing Operator position at 2296281 Alberta Inc., as advertised on the Indeed website.

I wasn't in a 3D Printing Operator position previously, but throughout my work life, I always was in an engineering role position. And I owned a business with my wife in Ukraine until the war began. So, I know how business works in detail.

In my previous role in our family business as an Embroidery Machine Operator and Designer, I specialized in crafting one-of-a-kind medical caps that brought joy and a touch of humour to healthcare environments. My proficiency in operating advanced embroidery machines allowed me to manage the entire embroidery process, ensuring each design was executed with precision and high quality.

A key aspect of my role was collaborating closely with customers to bring their creative visions to life. This experience honed my skills in customer service and project management, enabling me to deliver exceptional products that met and exceeded client expectations. My designs not only enhanced the professional atmosphere but also added a fun and engaging element to the medical settings in which they were worn.

With extensive experience in creating unique and humorous designs for medical caps, I am confident in my ability to contribute effectively to your team and help elevate your product offerings.

I believe, the attention to detail and dedication to quality that I bring to every project aligns perfectly with the values and standards upheld by 2296281 Alberta Inc.

I want to express my interest in volunteering with 2296281 Alberta Inc. for a two-week period. I am eager to contribute my skills and support your team during this time.

I am enthusiastic about the possibility of discussing how my background and skills align with the needs of your team. Thank you for considering my application. I look forward to the opportunity to discuss my candidacy further.

Sincerely,

Bohdan Latkovskyi
